

MBoss anti-fatigue matting offers unique raised multidimensional slip-resistant surface. Hundreds of molded pillars beneath the mat provide a buoyant surface for cushioning relief and exceptional support for heavy loads. The grid underside facilitates drainage and airflow, preventing moisture and odor buildup. Each mat has an exclusive snap interlock on one side to join multiple mats together. Additional connector strips make custom configurations a snap. Connectable yellow or black beveled edging is available to provide an added safety appearance. MBoss anti-fatigue matting is sound absorbing and easily cleaned.

Material: High quality rubber compound. Grease Resistant 50/50 Nitrile/SBR Blend

Thickness: 3/4"

Surface: Raised Multi-Dimensional non-skid surface

Color: Mat - Black
Edging - Black or Yellow
Corner - Black
