

Cushion Grid is designed specifically for wet environments, this mat features a raised surface and an open tube design that allows water to drain through easily, helping to maintain a safer, drier surface. The hollow tube construction provides air-cushioned comfort underfoot, reducing fatigue during long periods of standing. Made from all-vinyl material, the mat is 1/2" thick and resists oil, grease, fats, alkalis, and acids—making it a durable choice for demanding conditions. Its smooth, open surface enhances drainage and makes it ideal for wet floors in industrial, commercial, or recreational settings.

Material: All vinyl construction
Thickness: 1/2"
Surface: Smooth Open
